

EGS-SCRAMBIT

EGS-Scrambit is a software for your PDA/Smartphone that will resolve all of your security problems.

You can make totally secure calls and protecting your privacy without any change in your normal conversation mode.

With **EGS-Scrambit** you can use a simple interface very similar compared to the normal Windows® Mobile interface.

You can be sure that your calls are private and nobody will be able to intercept them.

EGS-Scrambit software will change your communication methods.

You will be able to make secure communication when using your GSM phone.

By using **EGS-Scrambit** software you will be sure that:

- You will be able to speak in a secure way
- Nobody will be able to intercept your conversations on your phone or on GSM network
- You can use a friendly interface, very simple and similar to your usual Windows® Mobile interface

Using **EGS-Scrambit** you will be protected from anyone who might want to intercept your private conversations.

EGI Security provides this innovative software for Smartphone/PDA with security being of paramount importance.

EGI Security mission is to provide specific software tools to protect the most precious thing for individual as well as for companies.
